Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *(1) the e-coating over the surface of the stack and (2) the e-coating scraped from the surface of the lamination features* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

1. The disclosure is objected to because of the following: it is unclear what is the so-called "*e-coating*" (page 6 line 2). Also "the e-coating" lacks antecedent basis in the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Claims 1-4 and 6-8** are rejected under 35 U.S.C. 112, *first paragraph*, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not clear disclose what is the material of the so-called "e-coating"?
3. **Claims 1-8** are rejected under 35 U.S.C. 112, *second paragraph*, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "an e-coating" is indefinite because it is not clear what is the material of the so-called "e-coating"?

In claim 5, "the stack laminations and "the stator stack" lack antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claim 5** is rejected under 35 U.S.C. 102(b) as being fully anticipated by Aiello et al (US 5965966).

Aiello discloses a spindle motor comprising a shaft (122) in a hub (100) with a permanent magnet rotor radially aligned with a stator (129) supported by outer surface of the shaft, an electrical grounding means (200) incorporated with an inner yoke of the stack

laminations to conductively and rigidly fixing the stator stack relative to the magnet while grounding the stator.

Regarding claims 1-4, and 6-8, given 35 USC 112 deficiencies set forth above and uncertainty as to the proper interpretation of the limitations of claims, it would not be proper to reject claims 1-8 on the basis of prior art. Therefore, no prior-art rejection against claims 1-4, 6-8 is given at this time.
